MIZUNO'S "RUN WITH US" MOBILE RUNNING LAB

We are pleased to welcome Mizuno's "Run With Us" Mobile Running Lab! This is your chance to experience a unique and customized biomechanical running analysis, and go for a test ride in some of the latest footwear technology. Experts will also be available to answer any questions you may have about Mizuno's award winning footwear.

The "Run With Us" grassroots campaign is a mobile running tech lab designed to provide expert analysis and recommendation for runners of all skill levels. It features a grand scale technical van which houses two of Mizuno's state-of-the-art "Precision Fit" terminals. There, runners are provided an innovative and thorough biomechanical analysis of their foot type and running needs. The "Precision Fit" procedure determines which type of running shoe best suits the runner's foot type, running style, and running goals. Runners are also given the opportunity to "test ride" Mizuno footwear that has been suggested for their individual biomechanics. All participants in the "Run With Us" program also receive a free Mizuno Dryscience™ T-Shirt.

For more information about "Run With Us" visit:
www.mizunousa.com

Note: There will be nothing sold at the event. This is just a fun opportunity to have a potluck dinner with hotdogs, try out some new shoe models, and run with friends.
